CHARGING YOUR TABLET

Assembling the power adapter

Your tablet is bundled with one of two types of USB power adapters: a fixed-prong type or a removable-prong type. Both types are described in this manual.

Fixed-prong type

Removable-prong type

Align arrows on the power adapter head and body. Insert the head onto the power adapter body and turn the head towards "CLOSE" printed on the head until it clicks into place. Simply slide the large end of the USB cable into the power adapter body (it will fit in only one direction).
Connecting power

Connect the power connector to your tablet and plug the AC adapter into any AC outlet.

⚠️ Warning
Only use an Acer-approved adapter to charge your device.

💡 Note
*It is normal for the tablet surface to become warm during charging or long periods of use.*

The Home screen

**Note**

Widgets display information such as the time and weather, or provide additional controls and direct access to APPs. Some have been pre-installed on your tablet, while others may be downloaded from Google Play.
The Home screen already features some useful controls and information.

Search

Search enables you to use a single, quick search to locate a variety of information on your tablet and on the internet.

To use Search, simply tap the Google icon and type words. As you’re typing, Tablet results may display below the search box. These results include past websites you’ve visited, any apps you have installed, Google Play music and movies in your library, and any contacts that contain your search words. If the result shows up that you want, simply tap it. To expand the list of Tablet results, tap Search Tablet.
(you may need to minimize the keyboard). You can also choose what *Tablet* searches for. After entering search words and tapping the search icon on the left side of the search box. Then tap **Settings > Tablet search**. Select the items you want to be included in a *Tablet* search.

You can then filter these *Web* search results by *News*, *Images*, and other types by tapping the desired filter at the bottom of the results screen. The filter list also has an option called *Tablet*; this functions the same as the *Tablet* search described above.

**Voice search**

If voice search is available, you can search using your voice. After tapping the **Google** icon, simply say the words "Ok Google" (or tap ) and then say the words you want to search for. The words display just as if you typed them. For information on using voice search within the *Chrome* app, see **Voice Search on page 27**.

Apps

Closing an application

To close an active application, go to Settings > Apps. Swipe over to the RUNNING tab, then tap the program you wish to close. Select Stop to close the program.

Uninstalling an application

You can remove programs installed on your tablet to free up extra storage memory. Tap the program icon from the Application menu and drag it into the Uninstall area in the top-left corner.

Note

You cannot uninstall APPs that were pre-loaded on your tablet.

Alternatively, you can go to APPs > Settings and select Apps. Tap the application you wish to uninstall, tap Uninstall and confirm the uninstall.

Important

You should only remove programs if you are familiar with the Android operating system.

Personal

Location services

Turning location services on enables certain apps to provide location-based services, such as the ability to check in, view commute traffic, find nearby restaurants, embed location information into pictures, and so on. You can turn location mode on or off completely, or just change your device's location accuracy mode. To modify location services information, tap APPs > Settings > Location.

Location modes

When setting the way your device determines your location, you have three options, or modes: High accuracy, Battery saving, and Device
only. Each mode uses different sources (or combination of sources) to estimate your device’s location.

**Note**
The "Device only" option uses Global Positioning System (GPS) technology; as such, to operate effectively, it usually requires a clear view of the sky and may take some time before it establishes location information.

**Synchronization**

You can sync your calendar, email and contacts on your tablet and never worry about losing them again. Sync in real time or adjust it as you please. In the *Application* menu, tap *Settings*. Under *Personal*, tap *Accounts*. Then tap the appropriate account to access the synchronization settings.

To add a new account, tap *Add account*. Select the type of account and then follow the onscreen instructions.

**Google Sync**

In Google, you can set synchronization for Google products including *Calendar*, *Chrome*, *Drive*, Gmail, and so on. In your Google account’s synchronization settings menu, tap the checkmark next to the item you would like to have auto-sync. To manually synchronize an item, uncheck the item (if it is checked) and then select the item. The item automatically starts syncing.

**Multiple Google accounts**

If you have multiple Google accounts, such as separate accounts for personal and business contacts, you can access and synchronize them from the Accounts settings section. Tap *APPs > Settings > Add account*.

**Changing language and text options**

Set your location and language input preferences by tapping *APPs > Settings > Language & input*. 
System

Setting the date and time

To set the date and time, tap **Apps > Settings > Date & time**.

Note

If you travel frequently or live in an area that uses daylight saving time, and have mobile network access, activate **Automatic time zone** from this menu. Your tablet will set the date and time based on information it receives from the network.

Setting alarms

There are two predefined alarms on your tablet by default. To add or edit alarm settings, tap **Clock** in the **Application** menu and tap [ ]. Tap the ON/OFF switch next to a preset alarm to turn it on or off or tap the [ ] to create a new alarm.

Tap a preset alarm to edit it. You can:

- Set the alarm time.
- Give it a memo (e.g., "Work").
- Set which days to repeat the alarm.
- Set a ringtone.
You can delete an alarm by tapping 🕒. This action can be undone by tapping UNDO.

**Updating your tablet’s operating system**

Your tablet can download and install system updates, adding support for new devices or expanding software options.

To check for updates, tap **APPs > Settings > About tablet > System updates > CHECK FOR UPDATE.**

**Note**

Downloading new firmware can take up to 40 minutes, depending on your network speed. Do not press the power or reset button or access your tablet in any way during a system upgrade to prevent firmware installation failure.

**Resetting your tablet**

A clean boot restores your tablet to the factory settings.

**Important**

This will erase all your personal information, any contacts stored on your tablet and any programs you installed.

To perform a clean boot, open **Settings** from the Application menu, then tap **Backup & reset > Factory data reset**; click **RESET TABLET** and then **ERASE EVERYTHING** to format your tablet.
